

Gourav Chantola

UI/UX Designer

India | 9729768665 | gk634204@gmail.com | Designedbygourav.com

UI/UX Designer focused on user-centered mobile experiences — from research and wireframing to high-fidelity prototypes in Figma. Recently designed an end-to-end AI cooking companion app and a fintech redesign centered on clarity and trust, with a growing focus on distinctive visual systems and personalization. Comfortable working across the full design process and quick to pick up new tools, including AI-assisted design and prototyping workflows.

TECHNICAL SKILLS

- Interface Design
- User-Centered Design
- Problem Solving
- UX Research
- User Testing
- Google Stitch
- Figma
- Canva
- Vibe Coding
- Wireframing
- Prototyping
- User Flow
- Miro
- Notion
- Claude
- Chat-GPT

EXPERIENCE

SHELF LIFE — *Personalized AI Cooking Companion*

- Designed a personalized AI cooking app that recommends meals based on kitchen inventory, taste preferences, lifestyle, budget, and cooking habits.
- Designed the end-to-end experience across onboarding, taste profiling, inventory management, personalized recommendations, recipe details, cooking mode, and feedback
- Created a distinctive Neo/Soft Brutalist mobile design system and personalization loop.

Secure Pay — *Fintech App*

A fintech app redesign focused on simplicity, trust, and unified card management.

- This is my first fintech case study. I learned a lot building it — especially about how much small decisions like a privacy toggle or card color actually matter to how safe someone feels using an app.
- Problem Statement
- How might we design a mobile payment experience that gives users instant clarity over their cards, spending, and payments — while feeling premium and trustworthy?

Freelance — *Graphic Designer*

- Designed logos, flyers, posters, and digital graphics based on client briefs and visual requirements.
- Created and edited marketing visuals for different formats while maintaining consistent visual hierarchy and branding.
- Collaborated with clients to understand requirements, iterate on concepts, and deliver final design assets.

EDUCATION

MAAC INSTITUTE — *Diploma in Graphic Design*

- Completed comprehensive training in graphic design, developing skills in visual - Created design projects including logos, posters, flyers, and other visual assets while applying principles of layout, color, and visual hierarchy.

SKILLTO — *UI/UX Designer Course*

- Completed hands-on training in UI/UX design, covering user-centered design, user flows, wireframing, prototyping, interaction design, and high-fidelity interface design.
- Developed UI/UX projects from problem definition and user flows through wireframes, visual design, and interactive prototypes using industry-standard design tools.
